

Park Ranger 2150 Dozer blade

The dozer blade really shows the strength and the power of the Park Ranger 2150. With the 4-wheel-drive and optimum weight distribution the machine removes large amounts of snow in a jiffy. Working at the same time with the salt and sand spreader the operator is able to remove the snow and de-ice the swept area in one pass.

The utility machine is one metre wide and the dozer blade is 1.3 m wide - and it can still reach small areas, as it can turn. Even if the dozer blade is completely turned, it stays clear of the utility machine.

With the Park Ranger 2150 the changeover from one attachment to another is done in less than 4 minutes - no tools required!

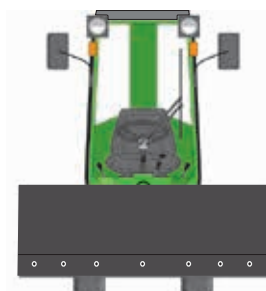

Technical data

Dozer blade

2.700 mm

1.300 mm

Special features

The dozer blade is equipped as standard with a safety tilt system and rubber scraping edge to protect both the machine and the surface being scraped.

Two adjustable skids.
